THE COMPLETE LLM INFRASTRUCTURE PLATFORM

16 apps. One binary. Zero dependencies.

Replace 6+ separate LLM tools with a single Go binary. 66 middleware modules, 16 provider integrations, 350+ API endpoints. Ships as a ~25MB binary with no external dependencies. SQLite for persistence. Bring your own API keys.

THE 16 APPS

App	What It Does
Proxy	Middleware chain, provider routing, caching, rate limiting
Observe	Tracing, cost attribution, alerts, anomaly detection
Trust	Hash-chained audit ledger, policies, compliance evidence
Studio	Prompt templates, A/B experiments, evaluations, distillation
Forge	DAG workflow engine, tool registry, agent runtime
Exchange	Config pack marketplace with one-click installs
Billing	Per-customer metering, Stripe integration, invoices
Team	RBAC, member management, per-member spend tracking
Memory	Conversation memory with relevance search
Recall	Incident response, PII auto-detection, notifications
Copilot	Natural language platform configuration via LLM
App Builder	No-code AI app store and marketplace
Knowledge	Document knowledge bases with full-text search
Reputation	Scoring, certifications, karma, leaderboards
Governance	Proposals, voting, disputes, compliance checks
Marketing	Launch campaign management (internal)

PRICING

Free	Pro	Team	Enterprise
\$0/mo	\$29/mo	\$99/mo	\$299/mo
Self-hosted All 16 apps 66 modules	Cloud-managed Zero ops Priority support	5 seats included RBAC + compliance \$20/seat additional	Unlimited seats SSO + SLA Dedicated support

EARN ON THE PLATFORM

Publish AI apps (80% revenue). Contribute GPU compute (88% earnings). Sell knowledge bases (80% royalties). Bill your customers (2.5% fee). All tiers including Free.
