WHAT YOU GET FREE

Full proxy across 16 LLM providers through one API. 76 runtime middleware modules (caching, rate limiting, PII redaction, safety filters) toggleable without redeployment. Complete tracing with cost, latency, and token counts. Hash-chained audit trail. Automatic cost routing via Drover (100 decisions/day). Adversarial security quickscan via Feral (5 probes, A-F grade). Unlimited requests. No credit card.
