

Six apps. One binary.

Zero dependencies.

Replace 6+ separate LLM tools with a single Go binary. 58 middleware modules, 16 providers, 62 REST endpoints. Self-host or cloud. Running in 30 seconds.

THE 6 APPS

Proxy	58 middleware modules in a chain. Routing, caching, cost caps, safety, rate limiting, shims.
Observe	Automatic tracing, cost dashboards, anomaly detection, real-time alerts.
Trust	Append-only audit ledger, hash-chain integrity, evidence packs, policy enforcement.
Studio	Versioned prompt templates, A/B experiments, benchmarks, snapshot comparison.
Forge	DAG workflow engine. Chain LLM calls, transforms, and tool calls.
Exchange	Config pack marketplace. Install providers, modules, routes in one click.
